

ENERGY MANAGEMENT SYSTEM POLICY of DALEKOVOD d.d. AND DALEKOVOD-PROJEKT d.o.o.

CONNECTING WORLDS, BUILDING THE FUTURE

Dalekovod d.d. is committed to sustainable development, achieving a balance between the environment, society and our activities to meet the needs of today without compromising the prospects of future generations to meet their needs. Sustainable development, transparency, and compliance with requirements (stakeholders, norms, laws) are a component of the Company's economic growth.

The scope of activity of Dalekovod d.d. i Dalekovod-Projekt d.o.o. is: the manufacture, sales, construction, supervision, consulting and design of electric power transmission lines and electric power-stations up to 750 kV, suspension and jointing equipment, railway facilities, roads, buildings, sports facilities, lighting, telecommunications lines and poles, lighting poles and halls, steel and other load-bearing structures, equipment of civil engineering and electric installations, and the provision of anti-corrosive metal protection.

The adopted policy refers to all facilities, processes, organizational units and energy sources on the location in the center of activity and energy sources for the needs of transport and operation of machines on temporary construction sites, by which the Companies commits to:

- △ continuously work on increasing the energy performance of companies by adopting and implementing programs of energy guidelines and goals,
- △ provide the resources and information necessary to carry out the necessary activities of the energy management system,
- △ monitor and meet all applicable legal requirements and regulations in the field of energy efficiency and energy application and consumption,
- △ in the procurement of energy, machinery, and other equipment, and in investments and reconstructions, include energy efficiency requirements to the extent economically justified, and
- △ to raise awareness of the rational use of energy by employees and other persons under the supervision of the company.

The energy policy is available through the bulletin board and the company's website to all employees and the interested public.

At least once a year, the company reviews and, depending on the need, changes the energy policy.

Zagreb, Rev: 1, 07.06.2021.
